

# T-box Intercompany Logistics

Does your company consist of several branches and do you distribute from a central warehouse? The branches supply and bill each other. This often involves processing data twice and the accompanying, unnecessary errors. Does that sound familiar? Acconet automates this process for you with T-box Intercompany Logistics!

## Logistics process

With T-box Intercompany Logistics you are in control of the logistic processes within your organisation. How? Mutual transactions are being exchanged between the administrations through T-box. You only have to enter an order once and T-box does the rest. Less manual input and therefore less errors in your stock management and payment traffic. Moreover, it offers you the opportunity of monitoring and controlling the turnover per location.

## What are the benefits to you?

- Control over the total logistic process
- Optimal cooperation between the branches
- No more double entering of data
- Changes in orders are automatically implemented
- Insight into the turnover per location

## Our clients:

- T-box of Acconet helps us to keep on improving ourselves as a company, which is a wonderful perspective for the future! (Monica Schlösser, Manager Operations at Omega)
- The T-box solution of Acconet automates every day actions to satisfaction. (Freek Cuypers, director of Born Sportscare)

## T-box for your company?
